Le protocole HTTP

Question 1)

INPUT : omergs@omerpc:~$ nc www.example.com 80 HEAD / HTTP/1.0 Host: example.com
OUTPUT : HTTP/1.0 200 OK Content-Encoding: gzip Accept-Ranges: bytes Age: 518722 Cache-Control: max-age=604800 Content-Type: text/html; charset=UTF-8 Date: Mon, 09 Sep 2024 14:37:39 GMT Etag: "3147526947" Expires: Mon, 16 Sep 2024 14:37:39 GMT Last-Modified: Thu, 17 Oct 2019 07:18:26 GMT Server: ECAcc (dcd/7D12) X-Cache: HIT Content-Length: 648 Connection: close

Question 2)

INPUT : omergs@omerpc:~$ nc www.example.com 80 GET / HTTP/1.0 Host: example.com
OUTPUT : HTTP/1.0 200 OK Accept-Ranges: bytes Age: 468377 Cache-Control: max-age=604800 Content-Type: text/html; charset=UTF-8 Date: Mon, 09 Sep 2024 14:39:10 GMT Etag: "3147526947" Expires: Mon, 16 Sep 2024 14:39:10 GMT Last-Modified: Thu, 17 Oct 2019 07:18:26 GMT Server: ECAcc (dcd/7D30) Vary: Accept-Encoding X-Cache: HIT Content-Length: 1256

Connection: close

```html
<!doctype html>
<html>
<head>
    <title>Example Domain</title>

    <meta charset="utf-8" />
    <meta http-equiv="Content-type" content="text/html; charset=utf-8" />
    <meta name="viewport" content="width=device-width, initial-scale=1" />
    <style type="text/css">
    body {
        background-color: #f0f0f2;
        margin: 0;
        padding: 0;
        font-family: -apple-system, system-ui, BlinkMacSystemFont, "Segoe UI", "Open Sans", "Helvetica Neue", Helvetica, Arial, sans-serif;

    }
    div {
        width: 600px;
        margin: 5em auto;
        padding: 2em;
        background-color: #fdfdff;
        border-radius: 0.5em;
        box-shadow: 2px 3px 7px 2px rgba(0,0,0,0.02);
    }
    a:link, a:visited {
        color: #38488f;
        text-decoration: none;
    }
    @media (max-width: 700px) {
        div {
            margin: 0 auto;
            width: auto;
        }
    }
    </style>
</head>

<body>
<div>
    <h1>Example Domain</h1>
    <p>This domain is for use in illustrative examples in documents. You may use this
    domain in literature without prior coordination or asking for permission.</p>
    <p><a href="https://www.iana.org/domains/example">More information...</a></p>
</div>
</body>
</html>
```

Question 3)

INPUT :

omergs@omerpc:~$ nc www.example.com 80
GET / HTTP/1.0
Accept-Encoding: gzip, deflate
Host: example.com

OUTPUT :

HTTP/1.0 200 OK

  </header>

  <p>nghttp2 is an implementation of
<a href="https://tools.ietf.org/html/rfc7540">HTTP/2</a> and its header
compression algorithm <a href="https://tools.ietf.org/html/rfc7541">HPACK</a> in
C.</p>

<p>The framing layer of HTTP/2 is implemented as a form of reusable C
library.  On top of that, we have implemented HTTP/2 <a href="/documentation/nghttp.1.html">client</a>, <a
href="/documentation/nghttpd.1.html">server</a>
and <a href="/documentation/nghttpx.1.html">proxy</a>.
We have also developed <a href="/documentation/h2load.1.html">load test and benchmarking tool</a> for HTTP/2.</p>

<p>We have participated in httpbis working group since HTTP/2 draft-04,
which is the first implementation draft.  Since then we have updated
nghttp2 library constantly to latest specification and nghttp2 is now
one of the most mature <a href="https://github.com/http2/http2-spec/wiki/Implementations">HTTP/2 implementations</a>.</p>

<p>All C APIs are <a href="/documentation/apiref.html">fully documented</a>.</p>

<p>HTTP/2 utilizes header compression method called <a href="https://tools.ietf.org/html/rfc7541">HPACK</a>.  We offer
HPACK encoder and decoder are available as <a href="/documentation/tutorial-hpack.html">public API</a>.</p>

  </header>

  <p>nghttp2 is an implementation of
<a href="https://tools.ietf.org/html/rfc7540">HTTP/2</a> and its header
compression algorithm <a href="https://tools.ietf.org/html/rfc7541">HPACK</a> in
C.</p>

<p>The framing layer of HTTP/2 is implemented as a form of reusable C
library.  On top of that, we have implemented HTTP/2 <a href="/documentation/nghttp.1.html">client</a>, <a
href="/documentation/nghttpd.1.html">server</a>
and <a href="/documentation/nghttpx.1.html">proxy</a>.
We have also developed <a href="/documentation/h2load.1.html">load test and benchmarking tool</a> for HTTP/2.</p>
```

```html
<p>We have participated in httpbis working group since HTTP/2 draft-04,
which is the first implementation draft.  Since then we have updated
nghttp2 library constantly to latest specification and nghttp2 is now
one of the most mature <a href="https://github.com/http2/http2-spec/wiki/Implementations">HTTP/2 implementations</a>.</p>

<p>All C APIs are <a href="/documentation/apiref.html">fully documented</a>.</p>

<p>HTTP/2 utilizes header compression method called <a href="https://tools.ietf.org/html/rfc7541">HPACK</a>.  We offer
HPACK encoder and decoder are available as <a href="/documentation/tutorial-hpack.html">public API</a>.</p>
